2.0. Frequency of Monitoring

The following table indicates the frequency at which monitoring is required for each point identified in EPL 3584. Special Frequency 1 means the collection of samples once each annual return reporting period where manure solids or effluent has been applied in the previous 12 months.

Table 1. Monitoring frequency required at each monitoring point.

4.0 Map of Monitoring Points

Maps showing the location of the monitoring points are included below.

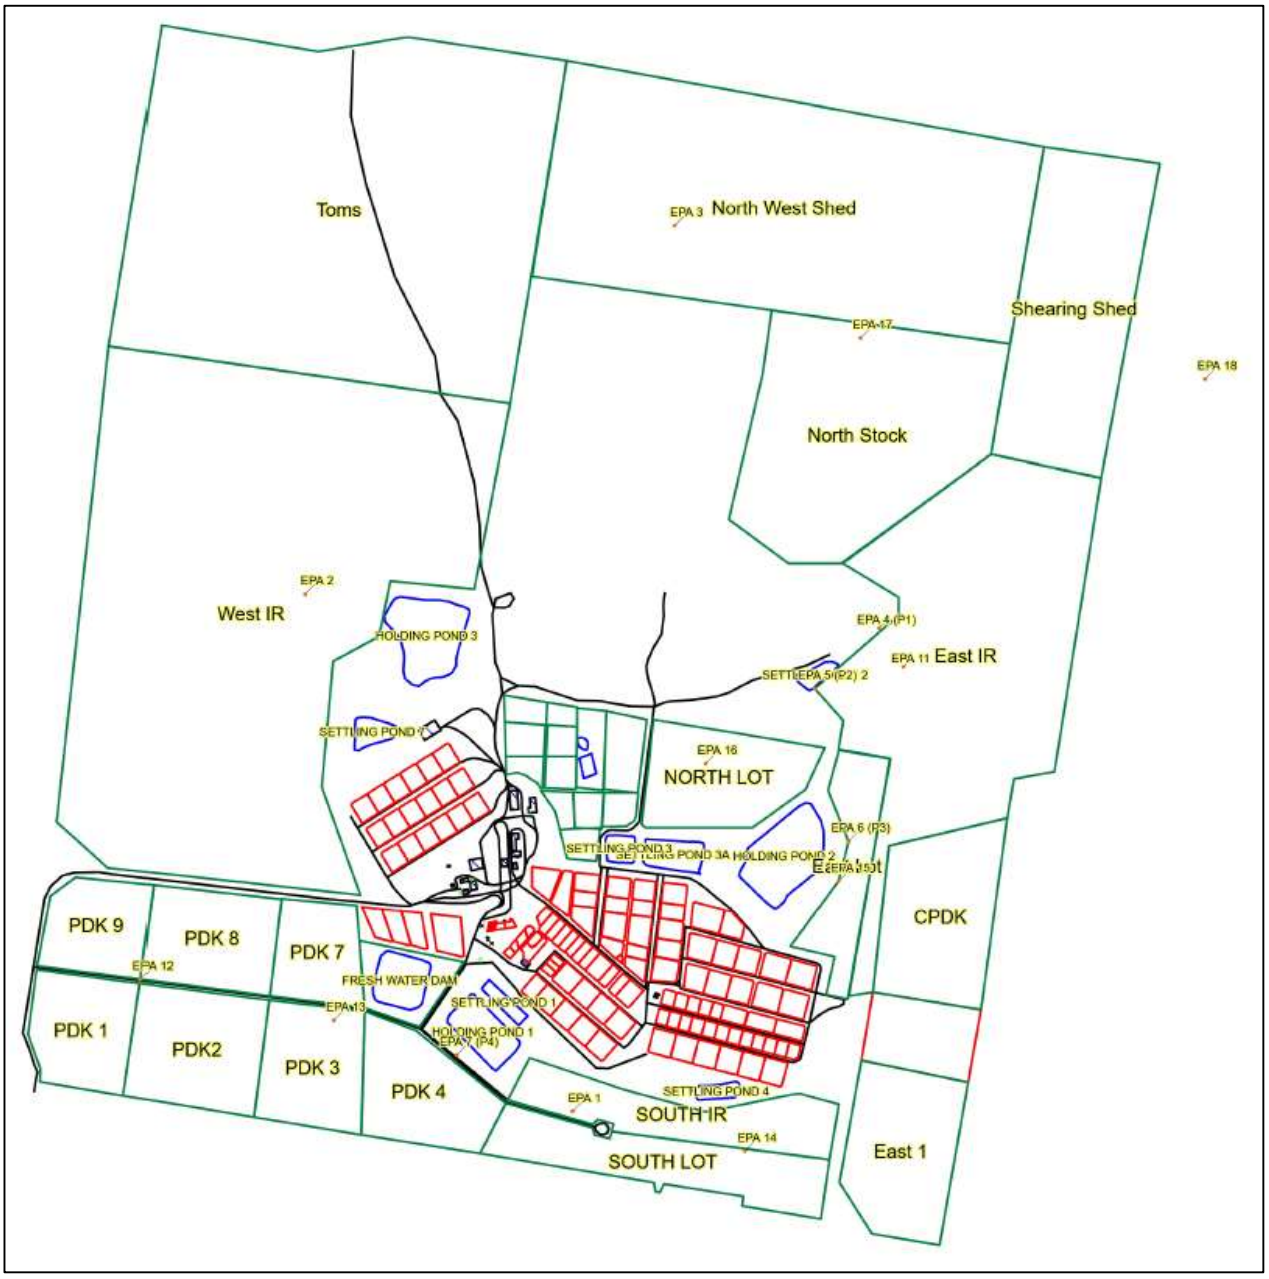

Figure 1. Map of the Jindalee site showing monitoring points identified in the license.

5.0 Notes on Monitoring Data

- Soil sampling data is not collected from paddocks where no effluent or manure is applied during the monitoring period.
- Groundwater bores are monitored 6 monthly. Due to groundwater conditions on site, no data is recorded where groundwater bores do not yield a groundwater sample during sampling.
- There were no non-compliances identified from sampling and testing, with limits contained in EPL.

Table 4: Manure and Effluent Application to paddocks for the period from 2022 to end of 2026 reporting period inclusive. Where no data is included no effluent or manure was applied to paddocks in that year. Manure removed during pen cleaning was composted and sold for these periods and effluent was evaporated from holding lagoons or evaporation basins.
